SKILLS

Languages

- Python
- C / C++
- Java

AI / ML

- Machine Learning
- Deep Learning
- CNNs, ANNs, RNNs
- Scikit-Learn, NumPy
- Pandas, Matplotlib

Web & Full-Stack

- MERN Stack
- React, Node.js
- MongoDB, Express

Cybersecurity

- Kali Linux & Linux
- Network Security
- Vulnerability Testing
- Firewall Configuration
- Network & Packet Tracing
- IDS / IPS Concepts
- Threat & Risk Analysis

IoT

- ESP32 / Microcontrollers
- Sensor Networks
- AI-driven Analytics

Sarthak Bhosale

Computer Engineering Student · AI & ML · Cybersecurity · Full-Stack

PROFESSIONAL SUMMARY

Tech enthusiast and engineering student passionate about building intelligent, secure, and connected systems. Hands-on experience from an AI internship at Accenture and a Cybersecurity virtual internship at Cisco, with proficiency spanning machine learning, Python, full-stack MERN development, IoT systems, and network security. Thrives on complex problems and leading collaborative teams to deliver innovative, real-world solutions.

EXPERIENCE

AI Intern *May – Jul 2025*

Accenture · Pune, Maharashtra

- Learned and applied core ML algorithms: Regression, SVM, Decision Trees, and Random Forest
- Worked with clustering and deep learning concepts including ANN, CNN, and RNN
- Gained practical exposure to Computer Vision and Reinforcement Learning
- Built a strong foundation in AI/ML and data-driven problem solving

Cybersecurity Virtual Intern *Jun – Jul 2025*

Cisco Networking Academy · Pune

- Completed virtual internship covering cybersecurity fundamentals and network protection principles
- Performed vulnerability assessments to identify threats, weaknesses, and attack vectors in network systems
- Configured and tested firewalls, intrusion detection systems (IDS), and access control policies
- Conducted network and packet tracing using Cisco tools to analyze and monitor traffic flows
- Studied malware types, phishing techniques, and applied cyber risk management frameworks
- Gained knowledge of secure communication protocols and network security best practices from Cisco NetAcad

Freelancer *May 2024 – Present*

Independent

- Completed multiple gigs in data cleaning, analysis, and data entry
- Worked as a website tester across various client projects

EDUCATION

B.Tech — Computer Engineering (Software Engineering) *2024 – 2028*

MIT Academy of Engineering, Pune

HSC — Higher Secondary Certificate *2022 – 2024*

Sanjay Ghodawat Junior College, Kolhapur

Tools

- Git & GitHub
- Docker
- Postman
- LLM Prompt Engineering
- Cursor AI

PROJECTS

Project VAYU – IoT-Based Air Quality Detection & Purification System (IoT + AI)

- Built an ESP32-based hardware system monitoring AQI, gas levels, dust, and temperature, connected to an auto-activating air purifier/ionizer for real-time remediation
- Developed a companion app featuring an AI chatbot that converses with the user about their respiratory health, analyzes historical AQI trends, and suggests personalized remedies and lifestyle improvements
- AI analyzer engine processes pollution data over time to proactively alert users and recommend actions to improve air quality around them

SAFAR – Smart Bus Journey Companion (Web App)

- Built transit tracking app triggering a proximity alarm 350m / 2 min before arrival at the nearest bus stop
- Improved accessibility for elderly and new travelers through geolocation and real-time alerts

AI-Powered Resume Builder – Datathon 2025 (MERN + LLM)

- Full-stack MERN platform leveraging LLM prompt engineering to auto-generate tailored professional resumes from user inputs

IoT Drone Delivery & Fire-Suppression System

- Web-controlled drone capable of remote package delivery and aerial deployment of fire extinguisher balls for high-altitude emergencies

ACCOMPLISHMENTS

- 1st Prize — GDG Nirmaan 4.0 Hackathon 2026 (MIT AoE): Architected "Project Vayu," an IoT air quality detection and smart purification ecosystem with AI-driven environmental insights and a conversational health assistant
- 2nd Runner-Up — GirlScript Datathon 2025 (MIT AoE): AI-powered resume builder on MERN stack, sponsored by Worqhat, Preskilit & Kalp Studio

CERTIFICATIONS & ACHIEVEMENTS

Apr 2026 1st Prize – Nirmaan 4.0 GDG Hackathon (MIT Academy of Engineering)

Feb 2025 2nd Runner Up – GirlScript DATATHON 2025 (AI-powered resume builder)

Dec 2025 L&T EduTech – Node.js and Backend Development with Git

Apr 2026 Completed All Claude-Anthropic Courses

Jul 2025 Summer Internship Certificate – Accenture (AI & ML)

Mar 2025 Python Essentials 1 & 2 – Cisco / PCAP Certification Track

Nov 2024 Cisco Networking Academy – Introduction to Kali Linux Basics
